HireBook will be a site entirely for Indian freelancers in which we will be providing both short-term and long-term projects for beginners and professionals. As we all know, In present days freelancing has become a major source of income for many people with a technical background. **"Not getting hired for projects and not being paid for the work are the major problems faced in this field"**. Considering these problems we decided to come up with a solution which benefits both clients and freelancers equally.
